### **CIRCULAR No. 292** **OSC Ref. C. 6222<sup>13</sup>**

**11<sup>th</sup> September, 2025**

Permanent Secretaries, Heads of Department and Chief Executive Officers are asked to invite applications from suitably qualified officers in their Ministries/Departments/Agencies to fill the **vacant post of Systems Administrator (MIS/IT 5)**, in the **Information Technology and Business Services Unit, Postal Corporation of Jamaica**, salary range \$4,266,270 - \$5,737,658 per annum.

#### **Job Purpose**

Under the general direction of the Information Manager, the incumbent is responsible for implementing, maintaining, supporting, and designing and developing scalable, highly available network architectures/communication networks that support the operations of the Postal Corporation. The incumbent monitors and maintains network performance by configuring switches and network appliances for optimal performance and troubleshooting network problems. The incumbent will be responsible for maintaining all network infrastructure, identifying and defining network related requirements to ensure consistency in the reliability, performance and quality of network systems, and the configuration of LAN/WAN devices to conform to predefined design specifications.

#### **Key Responsibilities**

##### ***Management/Administrative***

- Participates in the development of the Corporation's, Budget, Operational and Unit Plans;
- Assists with the development of operational systems, policies and procedures to guide the activities of the Unit;
- Prepares and submits activity/performance and other reports, as requested;
- Collaborates with Supervisor in the development of Unit and Individual Work Plans;
- Advises the Director on matters relating to portfolio responsibility;
- Represents the Corporation at meetings, seminars and special committees, as directed.

##### ***Technical/Professional***

- Configures and installs various network devices and Servers (e.g., routers, switches, firewalls, load balancers, VPN);
- Assesses system requirements and designs Local & Wide Area Network infrastructure;
- Designs, develops, implements and maintains safe, effective and reliable communication solutions;
- Ensures network connectivity of all Servers, workstations, telephony equipment, and other network equipment;
- Ensures bandwidth availability for application systems;
- Selects and implements security tools, policies, and procedures in conjunction with the Company's Security Team;
- Ensures that security levels are adhered to base on security policy and guidelines;
- Performs network maintenance and system upgrades including service packs, patches, hot fixes and security configurations;
- Monitors network performance and troubleshoots problem areas, as needed;
- Monitors and tests network performance and provides and analyses network performance statistics and reports to ensure system availability and reliability;
- Liaises with vendors and other IT personnel for problem resolution;
- Liaises with vendors of various information technology systems in determining relevant technologies and their suitability;
- Assists in the technical evaluation of tenders/bids from vendors/contractors for the supply and/or installation of products and/or services;
- Liaises with contractors for the proper installation and servicing of communication systems;
- Monitors and manages the implementation activities of vendors/suppliers;
- Tests network systems to ensure that a quality solution is accepted;
- Directs the work of external parties;
- Conducts research on technology trends and submits reports and recommendations on significant findings for follow-up evaluation;

- Monitors and captures relevant network statistics using available tools;
- Monitors system resource utilization, trending, and capacity planning;
- Builds and maintains relationships with all internal Units;
- Works together with other Units and Divisions within the Organization to identify any process improvements and improve standards, efficiency and effectiveness;
- Ensures awareness, approval and success of changes made to the network infrastructure, to include documentation and training;
- Performs any other related duties assigned by Supervisor.

### **Required Knowledge, Skills and Competencies**

#### ***Core:***

- Integrity
- Written and Oral Communication
- Customer and Quality Focus
- Initiative
- Problem Solving and Decision Making
- Teamwork and Co-operation
- Adaptability
- Interpersonal Skills
